

UCSF Malaria Elimination Initiative (MEI)

Key Managerial Challenges in Moving from Control to Elimination

Small Group Exercise

Group Topics for Moving from Malaria Control to Elimination

Group 1

- Effective case management and case investigation

Group 2

- Reactive case detection and foci investigation

Group 3

- Real-time surveillance and outbreak investigation and response

Group Topics for Moving from Malaria Control to Elimination

Group 4

- Targeted vector control (IRS, LLINs, larval source reduction) and vector surveillance

Group 5

- Chemoprevention for travelers, preventing re-introduction of local transmission

Group 6

- Behavior change, communication, and engaging all relevant stakeholders including community and private sector

Group Discussions: focus on community, primary, district, and provincial levels

- To what extent do your challenges 'connect with' these topics?
- Which ones are especially important for you and why?
- How prepared are you to take on the challenge of elimination

Group Debrief: concise feedback from each group on discussions
